

# Pine Meadow Mutual Water Company

---

November 29, 2017

**Subject:      Drinking Water Source Protection Program**

Dear Sir or Madam:

Pine Meadow Mutual Water Company obtains its culinary drinking water from high quality wells and springs within the service area of Pine Meadow Mutual Water Company. The Company believes these sources of drinking water are very valuable and has developed a plan to protect them from contamination. Part of this plan is to educate those people on ways to better protect the ground water that live within the water source collection areas. We believe it is in everyone's best interest to protect the ground water from contamination. The Company will periodically send you informational materials and specific requests to help protect all our sources of drinking water.

The Company requests that you follow several safeguards including:

- Do not use septic cleaners in septic systems.
- Utilize State an approved business for waste disposal.
- Notify Pine Meadow Mutual Water in the event of a leak or spill.
- Use chemicals in accordance with manufacturer's directions and dosages including fertilizers and pesticides.
- Store chemical and or fuel containers indoors, either on impervious surfaces or on shelves over an impervious floor.
- Install backflow prevention devices on domestic wells
- Notify Pine Meadow Mutual Water Company if a well becomes abandoned

We sincerely appreciate your efforts in protecting the ground water supply that we all utilize. If you have any questions or if we can assist you in any way please contact me at 801-641-0111.

Sincerely,

*Brady Blonquist*

Water System Manager
